Kitchener, ON, Canada | hannatuessien98@gmail.com | linkedin.com/in/hannatu-agbadalo-essien-823a43203

PROFESSIONAL SUMMARY

Senior Business Analyst with 10+ years of progressive experience spanning enterprise IT initiatives, government programme delivery, and large-scale digital transformation. Proven track record eliciting and documenting complex functional and business requirements, authoring user stories with clear acceptance criteria, and bridging the gap between technical teams and non-technical stakeholders. Experienced in ERP and CRM system implementations (Oracle ERP, SAP Enterprise), UAT design, defect management, and structured SDLC governance within Agile/Scrum delivery environments. Adept at working within structured governance frameworks — including government client engagements — and translating ambiguous business needs into prioritised, actionable solution designs. Currently expanding expertise in Microsoft Dynamics 365 CE/F&O.

CORE COMPETENCIES

- | | |
|---|--|
| • Requirements Elicitation & Analysis | • Azure DevOps & JIRA |
| • User Stories & Acceptance Criteria | • Stakeholder Facilitation & Workshop Delivery |
| • UAT Design, Test Scripts & Defect Management | • Functional & Technical Design Reviews |

| • Microsoft Dynamics 365 CE / F&O (in progress) | • Business Process Optimisation & BPMN |
| • Oracle ERP & SAP Enterprise Administration | • Confluence, MS Visio, Excel, PowerPoint |

WORK EXPERIENCE

Business Analyst | STADXL Consulting — Mississauga, ON

May 2022 – Present

Contract | Part-time engagement alongside independent BA practice

- Lead requirements elicitation and documentation for 3 concurrent workstreams, producing 25 user stories and functional requirements in Confluence — ensuring full traceability from business need to solution design.
- Design and execute UAT test scripts for system upgrades and application enhancements, identifying 15 client-requirement defects pre-deployment and achieving zero critical issues at go-live.
- Administer Oracle ERP system, standardising core business processes and improving system processing speed by 97% — eliminating redundant manual steps and reducing end-to-end transaction time across business units.
- Facilitate requirements workshops and design reviews with 15+ stakeholders, translating complex business needs into prioritised product backlogs and clear acceptance criteria.
- Create and maintain process documentation using BPMN, MS Visio, and PowerPoint, providing structured artefacts for stakeholder review and knowledge transfer.
- Support defect identification, analysis, and validation cycles within Agile/Scrum delivery sprints, contributing to continuous improvement across the SDLC.

Business Analyst | British Council — Abuja, Nigeria

Oct 2016 – Apr 2022

- Facilitated 42 stakeholder workshops across programme areas, documenting requirements, key decisions, and action items in JIRA and MS Excel — enabling faster, evidence-based programme decisions.
- Delivered data analysis and predictive modelling that informed budget reallocation of \$20,000 toward high-performing government structures, with measurably improved fund utilisation and programme impact.
- Developed 6 business cases and user stories for system improvements, ensuring solution designs aligned with strategic objectives and defined acceptance criteria.
- Engineered scalable, reusable process frameworks to accelerate digital transformation initiatives, reducing process design time for new programme workstreams.
- Managed a team of 3 analysts, overseeing requirements delivery and ensuring seamless execution within defined project scope and governance structures.

Business Analyst | Nigeria Stability & Reconciliation Programme — Kaduna

Oct 2015 – Oct 2016

- Conducted structured data discovery and analysis across 25 datasets, uncovering patterns and insights that directly shaped the costed State Peace and Security Action Plan.

- Delivered analytical outputs to senior government officials, civil society leaders, and High Court judges — informing policy changes and programme resource allocation decisions.
- Built predictive models using programme data, providing decision-ready intelligence to stakeholders and improving the rigour of insight-driven planning.
- Developed scalable analytical processes and data products to support evolving business and programme needs, identifying continuous improvement opportunities.
- Communicated findings to non-technical stakeholders using MS Visio and structured presentations, identifying new opportunities where analytics could drive programme value.

Programme Officer | Nigeria Stability & Reconciliation Programme — Kaduna

May 2013 – Sep 2015

- Provided technical support to programme partners implementing projects across three senatorial districts; led project design, output oversight, and stakeholder group platform establishment.

Programme & Development Executive | Gender Awareness Trust — Kaduna

Jan 2006 – Apr 2013

- Led design and implementation of strategic community programmes, ensuring compliance with Statement of Work agreements and delivering measurable community outcomes.
- Conducted research, data collation, and analysis to drive continuous improvement across programme areas.
- Delivered training and workshop facilitation, improving knowledge transfer and stakeholder capability.
